

**GUJARAT TECHNOLOGICAL UNIVERSITY****BE - SEMESTER-VI (NEW) - EXAMINATION – SUMMER 2017****Subject Code: 2160704****Date: 03/05/2017****Subject Name: Theory of Computation****Time: 10:30 AM to 01:00 PM****Total Marks: 70****Instructions:**

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.
4. In the questions the symbol  $\Lambda$  denotes the null string, i.e., the string of length zero.

**MARKS****Q.1 Answer the following questions:**

- |          |   |           |
|----------|---|-----------|
| <b>1</b> | Define onto and one-to-one functions.   | <b>02</b> |
| <b>2</b> | Give recursive definition of a tree.  | <b>03</b> |
| <b>3</b> | Define reflexivity, symmetry, and transitivity properties of relations.   | <b>03</b> |
| <b>4</b> | Consider the relation $R = \{(1,2), (1,1), (2,1), (2,2), (3,2), (3,3)\}$ defined over $\{1, 2, 3\}$ . Is it reflexive? Symmetric? Transitive? Justify each of your answers. | <b>03</b> |
| <b>5</b> | Draw truth table for following logic formula: $P \rightarrow (\neg P \vee \neg Q)$ . Is it a tautology? A contradiction? Or neither? Justify your answer.                   | <b>03</b> |

**Q.2 (a)** Define DFA and NFA and NFA-  $\Lambda$  **03**

- (b)** Give recursive definitions of the extended transition functions,  $\delta^*$  (i.e., for strings) for DFA and NFA. **04**
- (c)** Minimize the DFA shown in Fig. 1. **07**

**OR**

- (c)** Consider the NFA- $\Lambda$  depicted in following table: **07**

	$\Lambda$	a	b	c
$\rightarrow p$	$\Phi$	{p}	{q}	{r}
q	{p}	{q}	{r}	$\Phi$
* r	{q}	{r}	$\Phi$	{p}

(i) Compute the  $\Lambda$ -closure of each state.(ii) Convert the NFA- $\Lambda$  to a DFA.**Q.3 (a)** Explain 'finite state machines with outputs'. Discriminate between Mealy and Moore machines. **03****(b)** Convert the Moore machine shown in Fig. 2 into an equivalent Mealy machine. **04****(c)** Use Pumping Lemma to show that  $L = \{x \in \{0,1\}^* \mid x \text{ is a palindrome}\}$  is not a regular language. **07****OR****Q.3 (a)** Give recursive definition of regular expressions. State the hierarchy of the operators used in regular expressions. **03****(b)** Using constructive approach determine NFA-  $\Lambda$  for the regular expression  $(0 + 1)^*1(0 + 1)$ . **04****(c)** Fig. 3 shows two DFAs M1 and M2, to accept languages  $L_1$  and  $L_2$ , respectively. Determine DFAs to recognize  $L_1 \cup L_2$ . **07**

- Q.4** (a) Give formal definition of PDA. Give mathematical description of ‘acceptance of a string by a PDA by empty stack’. **03**
- (b) Give the recursive definition of the iterated derivation (i.e., derivation in zero or more steps), denoted as  $\Rightarrow^*$ . Give mathematical description of the language of a CFG. **04**
- (c) Consider following grammar: **07**  
 $S \rightarrow A1B$   
 $A \rightarrow 0A \mid \Lambda$   
 $B \rightarrow 0B \mid 1B \mid \Lambda$   
 Give leftmost and rightmost derivations of the string 00101. Also draw the parse tree corresponding to this string.
- OR**
- Q.4** (a) Define CFG. When is a CFG called an ‘ambiguous CFG’? **03**
- (b) Consider following grammar: **04**  
 $S \rightarrow ASB \mid \Lambda$   
 $A \rightarrow aAS \mid a$   
 $B \rightarrow SbS \mid A \mid bb$   
 i. Eliminate useless symbols, if any.  
 ii. Eliminate  $\Lambda$  productions.
- (c) Convert the following grammar to a PDA: **07**  
 $I \rightarrow a \mid b \mid Ia \mid Ib \mid IO \mid II$   
 $E \rightarrow I \mid E * E \mid E + E \mid (E)$
- Q.5** (a) Give definition of Turing Machine. What do you mean by an instantaneous description of a Turing Machine? **03**
- (b) Describe recursive languages and recursively enumerable languages. **04**
- (c) Design a Turing machine to accept the language  $\{0^n 1^n \mid n \geq 1\}$ . **07**
- OR**
- Q.5** (a) Briefly describe following terms: (1) halting problem (2) undecidable problem **03**
- (b) Using pumping lemma for CFL’s, show that the language  $L = \{a^m b^m c^n \mid m \leq n \leq 2m\}$  is not context free. **04**
- (c) Design a Turing machine for the language over  $\{0,1\}$  containing strings with equal number of 0’s and 1’s. **07**

\*\*\*\*\*
